

ABOUT US

Trojan Crates Ltd is a family owned manufacturing business based in Aberdeen, Scotland.

Established in 1979, we provide bespoke timber crating, tailored CNC engineered foam inserts, custom flight cases, and protective packing solutions to a variety of industries worldwide.

In business for over 40 years, our experienced team will provide peace of mind storage advice and a cost effective solution to your specific packaging requirements. We also offer 24/7 all year round call out service, no matter the size of the job.

CNC ENGINEERED FOAM INSERTS

The most important part of any protective case is the packaging inside it.

We stock a variety of foam types, colours, and densities to protect everything from sensitive electronics to deep water housing, machinery, and plenty more.

We also manufacture shadow boards. Made from strong, durable materials to ensure your tools and equipment is stored safely. They can be wall mounted or free standing.

Trojan can provide you with CNC inserts for any size case, and can be purchased alone to add extra protection to cases you may already own.

PROTECTIVE CASES

Trojan Cases

Our most cost effective protective case. Tough, waterproof, and secure. Made from PPC and IP67 certified, these cases can be safely submerged in water for up to 30 minutes and 1 metre depth. They are suitable for extreme temperature changes from -30°C to 90°C.

Peli Storm & Protector Cases

A crushproof, waterproof, chemical resistant, and corrosion proof case. All cases include a pressure purge valve, and come with an impressive lifetime guarantee.

Aluminium Cases

A durable and portable range of aluminium cases. Made from a robust, fully welded, lightweight material and supplied by Zarges.

BESPOKE CRATES & FLIGHT CASES

We manufacture Timber and Plywood crates using sustainable materials. All our timber is heat treated to ISPM15 standards and can be shipped worldwide without any import restrictions or customs delays.

Using state of the art 2D and 3D design software, we can design and manufacture a custom flight/transit case for any purpose in any industry. Available in a variety of colours.
